

Technical Project Manager

Company: Dataworks Analytics

Location: Lagos

About Us

Dataworks Analytics & Consultancy Services is a niche IT and Data consulting firm, with the drive, expertise and focus to protect, secure, and unlock the hidden value in an organisation's data and information assets.

Job Description:

We are seeking an experienced and proactive Technical Project Manager specializing in Cyber Security, Data Protection, and Data Management to join our dynamic team at Dataworks Analytics. As the Technical Project Manager, you will lead and oversee the execution of strategic projects related to cybersecurity, data protection, and data management.

In addition, you will be supporting the leadership of Datawork's with developing and our project management office.

Key Responsibilities:

Project Leadership:

- Lead the planning, execution, and delivery of complex technical projects related to cybersecurity, data protection, and data management.
- Define project scopes, objectives, timelines, and deliverables while ensuring alignment with client requirements and company goals.
-

Team Management:

- Manage and collaborate with cross-functional teams including cybersecurity experts, data protection practitioners, and IT professionals to achieve project objectives.
- Coordinate resources, assign tasks, and provide guidance to ensure project milestones are met within budget and schedule.
- Risk Management and Compliance:
- Identify potential risks and proactively implement mitigation strategies to ensure the security and integrity of data systems.
- Ensure projects comply with industry regulations, data protection laws (NDPR and GDPR), and cybersecurity standards.
- Experience with working with Agile and waterfall methodologies
- Provide regular project updates, reports, and presentations to senior management and key stakeholders.
- Implement quality control measures and conduct thorough testing to ensure the reliability and effectiveness of cybersecurity solutions and data management strategies.

Requirements:**Education:**

- Bachelor's degree in computer science, Information Technology, or a related field. Master's degree or certifications in Project Management. Cybersecurity and Data Protection

Experience:

- Proven experience (5 years) as a Technical Project Manager in Cyber Security, Data Protection, or Data Management.
- Strong background in managing technical projects involving cybersecurity protocols, data encryption, vulnerability management, and information security.

Skills:

- In-depth knowledge of cybersecurity frameworks ISO 27001, data protection regulations (e.g., NDPR, GDPR), and best practices in data management.
- Experienced of planning and delivering information security projects to ISO 27001 & ISO27002, NIST compliance standards, along with other standards such as PKI, PCI DSS, etc.
- Excellent, project and programme planning, budgeting and leadership skills.
- Strong relationship building and stakeholder management skills.
- Proficiency in project management tools (MS Project, Jira, Planner), risk assessment, and IT governance principles.
- Excellent leadership, communication, and problem-solving skills.

Preferred Qualifications:

- Certification in Project Management (PMP, PRINCE2) or Agile Certifications
- Experience in implementing cybersecurity solutions or managing data protection projects in a corporate environment.

This job will be ideal for an experienced and delivery focused technical project manager or project manager who has delivered complex projects and wants a new challenge in a growing industry. They should be comfortable applying themselves within a company that is still in the start-up phase.
